# KLADS

High-Quality Certified Cladding Panels  
for Exterior Applications

Engineered for durability and aesthetics, KLADS by Rushil Decor Limited is a premium range of thermoset High-Pressure Laminates (HPL) that meet the rigorous standards of EN 438-6 (Type EDF) and EN 438-7 (Type EGS). Designed specifically for exterior use, these certified panels offer outstanding weather resistance, structural stability, and long-term performance.

Ideal for balcony and façade cladding, KLADS combines robust protection with contemporary architectural appeal—making it the smart choice for high-end exterior solutions. Backed by a 10-year warranty, KLADS ensures peace of mind along with unmatched style and strength for your projects.

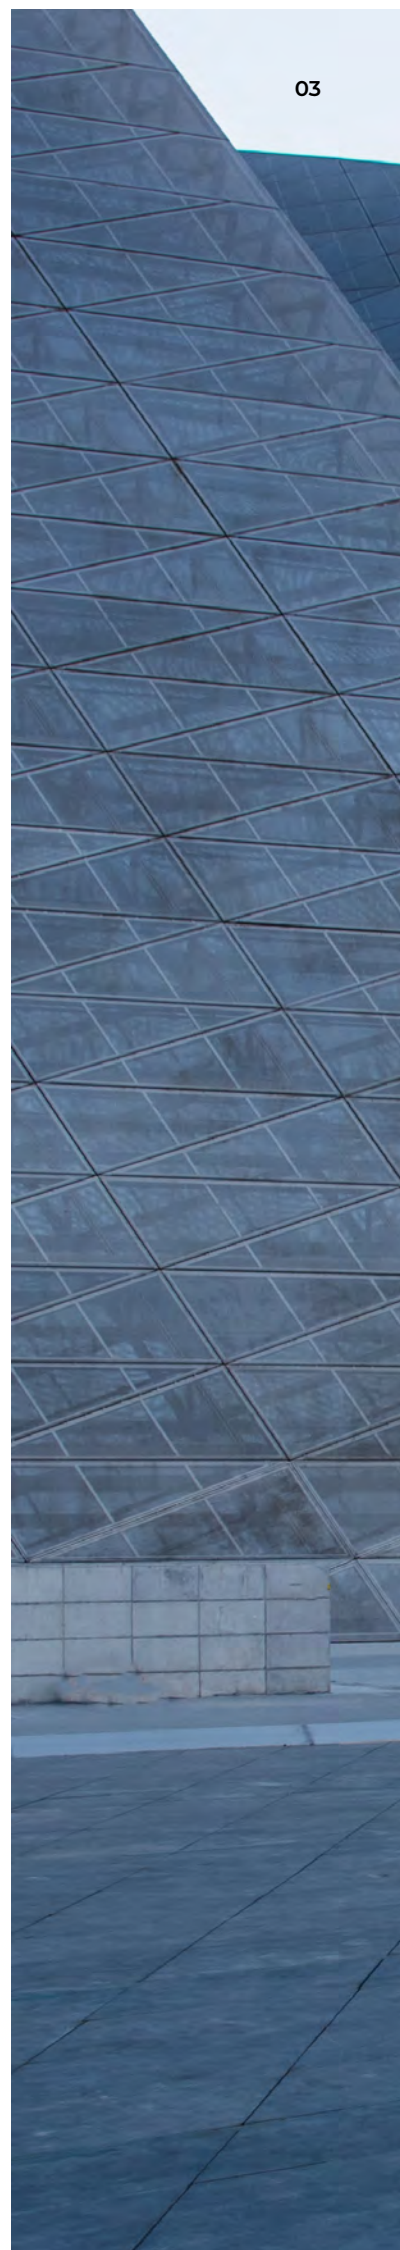

# Convert Your Thoughts

When architecture meets endurance, KLADS is born — a name that stands for more than just cladding. It represents a new vision in exterior design, where high-performance materials don't just protect structures, but elevate them. KLADS Exterior HPL Compact Laminates are engineered to withstand the harshest of elements, while delivering a design language that's refined, bold, and timeless. From sun-scorched urban towers to wind-beaten coastal resorts, KLADS stands tall — unfading, unbending, and undeniably stylish.

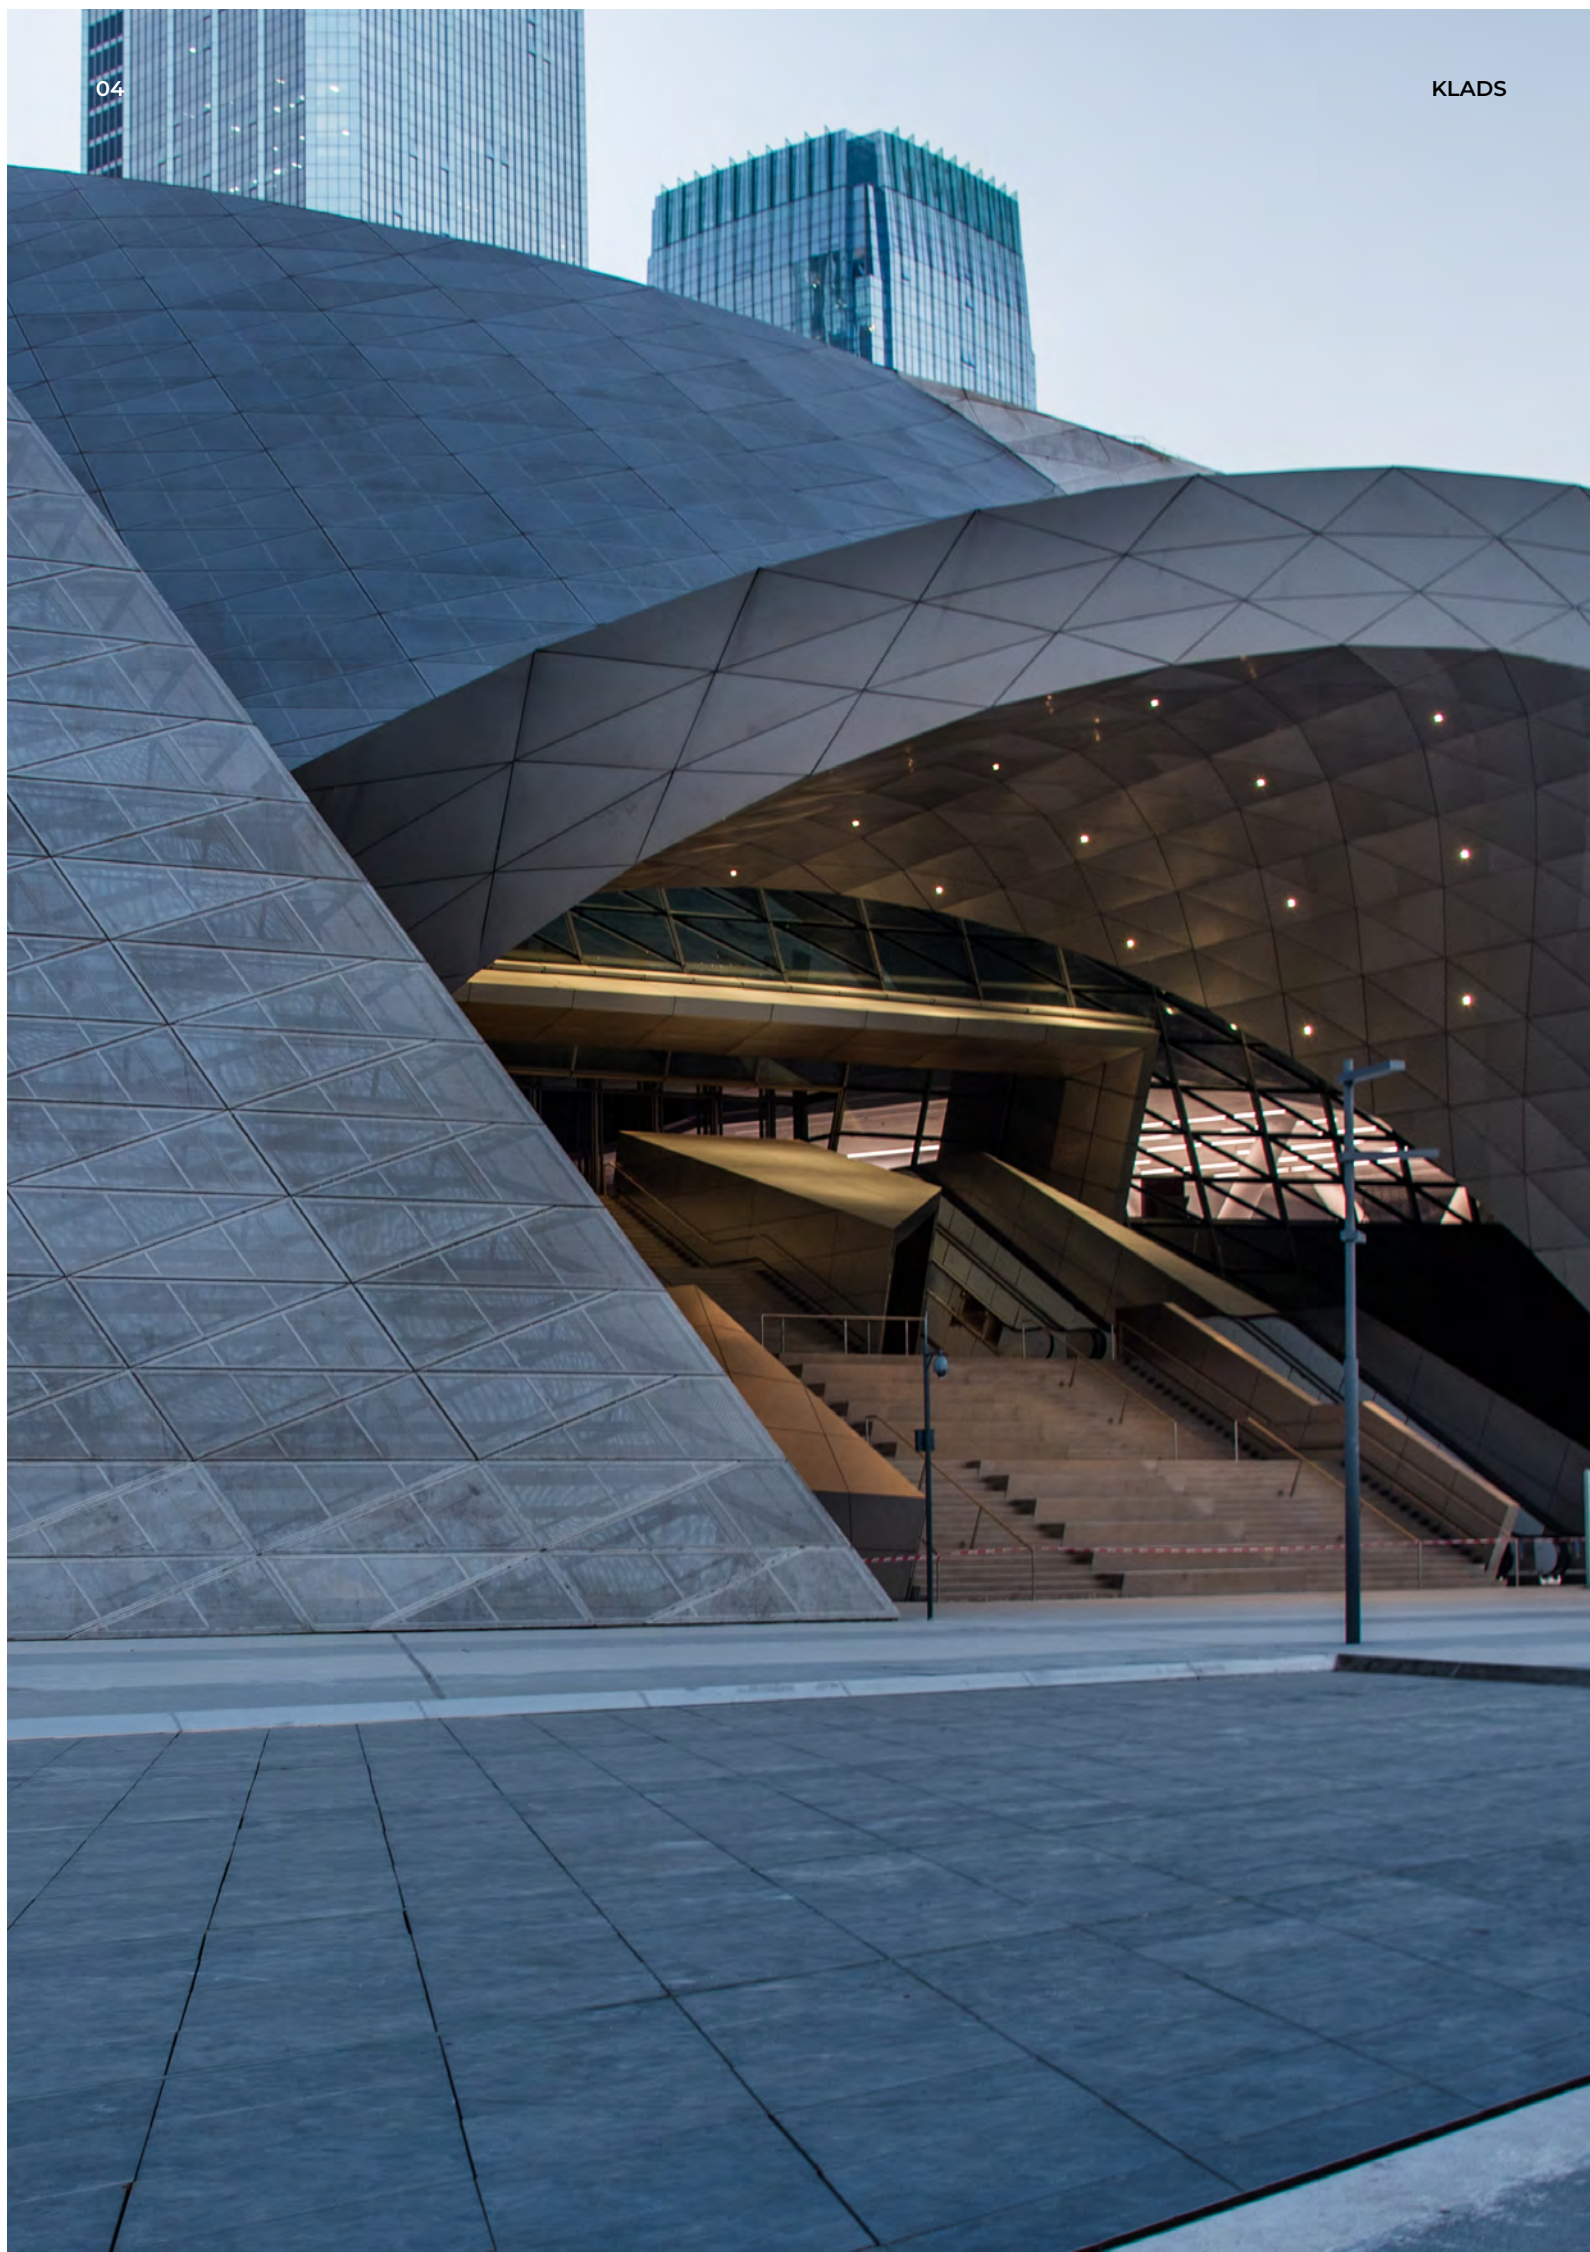

What inspires KLADS is the belief that durability should never come at the cost of beauty. Each panel acts as a second skin for your building — a strong, weatherproof barrier that resists UV rays, moisture, graffiti, and impact. Yet beneath this toughness lies a layer of thoughtful craftsmanship — textures that mimic natural wood, stones that echo earthy tones, and solid colors that make a statement. It's a surface solution that doesn't just cover, it expresses.

Designed for visionaries — architects, builders, and designers who refuse to compromise — KLADS brings together aesthetic brilliance and structural reliability. It empowers bold façades, sharp lines, and sustainable architecture, making it the preferred choice for those who build not just for today, but for the decades to come. More than just panels, KLADS is a design philosophy — one that blends innovation, craftsmanship, and responsibility into every square foot.

With KLADS, exterior design finds its shield. And buildings find their voice.

# Construction Overview

This diagram shows the multi-layered construction of KLADS. It includes a UV Protection Film, overlay film, and decorative paper treated with MF resin for surface durability.

The core consists of multiple layers of kraft paper impregnated with PF resin for structural strength. Together, these layers are compressed to form a dense, weather-resistant, and impact-proof panel.

# Disclaimer

All application visuals and renders shown in this catalogue are for illustrative purposes only. Actual product appearance and application may vary.

Due to printing limitations, color and design reproduction in this catalogue may differ slightly from the actual product. Customers are advised to refer to physical samples before final selection or confirmation.

QR code previews are intended for reference only. The appearance of colors, textures, and finishes may vary across different devices due to variations in screen settings, brightness, resolution, and color calibration. Please refer to the physical sample for the most accurate representation.

All dimensions mentioned in this catalogue are in millimetres (mm) unless otherwise specified. Where different units are used, they will be clearly indicated alongside the dimensions.

The company reserves the right to modify, update, or discontinue any design, shade, or specification without prior notice.

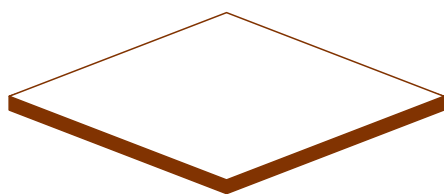

# Product Configurations

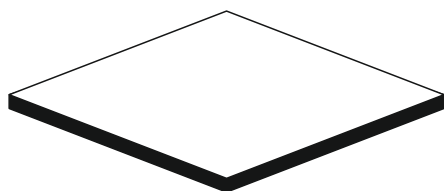

KLADS Compact HPL is available in a range of product configurations to meet diverse design and architectural requirements. From our standard Brown Core construction to optional Black Core panels and precision CNC Design Services, each configuration is designed to provide greater flexibility for modern façade and exterior applications.

Choose the configuration that best complements your project's aesthetic vision and functional requirements.

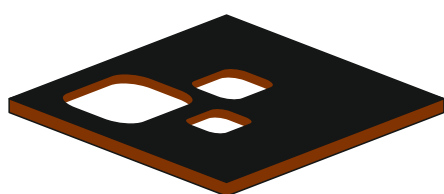

## Standard Core

Brown Core is the standard core configuration offered across the KLADS Compact HPL range, delivering exceptional strength, stability, and long-term performance.

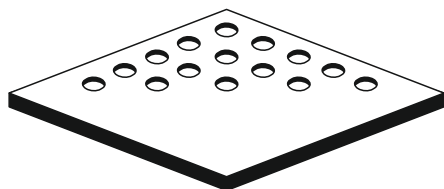

## Black Core

Black Core is available as a custom option upon request and is subject to applicable minimum order quantity requirements.

## Design Services

Expand your design possibilities with KLADS CNC Design & Perforation Services. Using advanced precision CNC machining, we create custom cut-outs, intricate patterns, engravings, decorative perforations, and bespoke architectural panels tailored to your project requirements. Whether for expressive façade elements, privacy screens, feature walls, or functional cladding solutions, KLADS delivers exceptional accuracy, premium craftsmanship, and design flexibility.

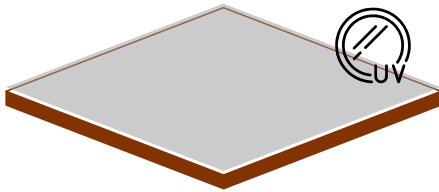

From concept to execution, our CNC capabilities empower architects and designers to transform creative ideas into precision-engineered architectural features. Every panel is manufactured with meticulous attention to detail, ensuring clean edges, dimensional accuracy, and consistent quality. With the ability to customize patterns, perforation densities, and panel layouts, KLADS offers limitless design possibilities for distinctive and contemporary architectural expressions.

Available on request, subject to design feasibility, panel specifications, and minimum order requirements.

# Grade Configurations

KLADS Compact HPL is offered in multiple exterior-grade configurations engineered to meet varying performance requirements. Whether your project requires single- or double-side UV protection, enhanced fire-retardant properties, or both, each grade is developed to deliver long-lasting durability, weather resistance, and dependable performance in demanding exterior environments.

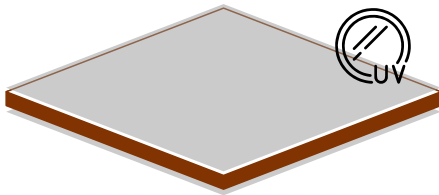

Select the appropriate grade based on your project's exposure conditions, performance requirements, and applicable safety standards.

## EGS-1 UV - UV Shield

Engineered with single-side UV protection, this grade is designed for exterior applications where only the exposed face is subjected to sunlight and weathering. It offers excellent colour retention, surface durability, and long-term outdoor performance.

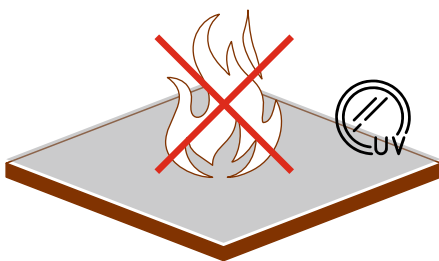

Exterior wall cladding | Building façades | Canopies  
Entrance features | Architectural accents | Balcony fascia

## EGS-2 UV - UV Shield Plus

Featuring double-side UV protection, this grade provides enhanced stability and weather resistance by protecting both faces of the panel. It is recommended for applications where both sides are exposed to outdoor conditions or where balanced panel performance is required.

Freestanding architectural panels | Pergolas | Privacy screens  
Double-sided façade elements | Balcony partitions | Fencing systems

## EGF-1 UV - FireShield UV

Combining single-side UV protection with fire-retardant performance, this grade is developed for projects requiring enhanced fire safety while maintaining long-term exterior durability.

Commercial buildings | Educational institutions | Healthcare facilities  
Hospitality projects | Public infrastructure | High-rise façades

## EGF-2 UV - FireShield UV Plus

The highest-performance configuration in the KLADS range, this grade combines double-side UV protection with fire-retardant properties for demanding architectural applications requiring superior weatherability, dimensional stability, and enhanced fire performance.

Airports | Metro stations | Government buildings | Public infrastructure  
High-rise developments | Institutional projects | Premium commercial

# Application Scope

From concept to completion, we've got you covered.

KLADS offers virtually limitless design possibilities—an inspiring chance to create something truly remarkable, even on a modest budget. From making a bold statement in a public space to transforming urban landscapes with high-definition effects or striking colors, the possibilities are endless. Whether for the home or workplace, KLADS ensures spaces are never dull, combining surface decoration that's as practical as it is visually captivating.

# Work & Wellness

Klads is the antidote to uniformity in modern office buildings. With a vast array of decors and unmatched versatility, Klads empowers every building to stand out with its own unique identity. Our high-definition architectural cladding is the perfect solution for multifunctional office buildings of every scale. Whether the requirement is vibrant bold colors, the warmth of natural wood grains, or the substantial appeal of stone and steel finishes, our collections offer a wide spectrum of aesthetic choices. Engineered with inherent flexibility, these solutions are ideal for suspended ventilated facades, balconies, terraces, sun protection features, external partitions, fences, and railings—bringing durability, design, and distinction together.

# Residential

All products from Klads are manufactured to the highest standards of architectural cladding. They are the ideal facing solution for domestic projects of every kind, combining refined finishes with exceptional stability, easy installation, and effortless maintenance. Perfectly suited to the residential scale, our high-definition cladding adds depth, detail, and an unmistakable air of quality. Especially in contemporary designs, the clean, simple lines and wide range of tonal options help create a bespoke, premium look at an accessible cost. Beyond aesthetics, these cladding solutions also support insulation performance requirements, while their durability and low-maintenance nature make them a smart, long-lasting choice for homeowners.

# Finishes

Depth, Detail, Distinction

More than flat finishes, our laminate textures offer a rich sensory layer to your designs. The interplay of light and surface brings out the character of wood or stone-like finishes. Each panel feels handcrafted — elevating both look and feel.

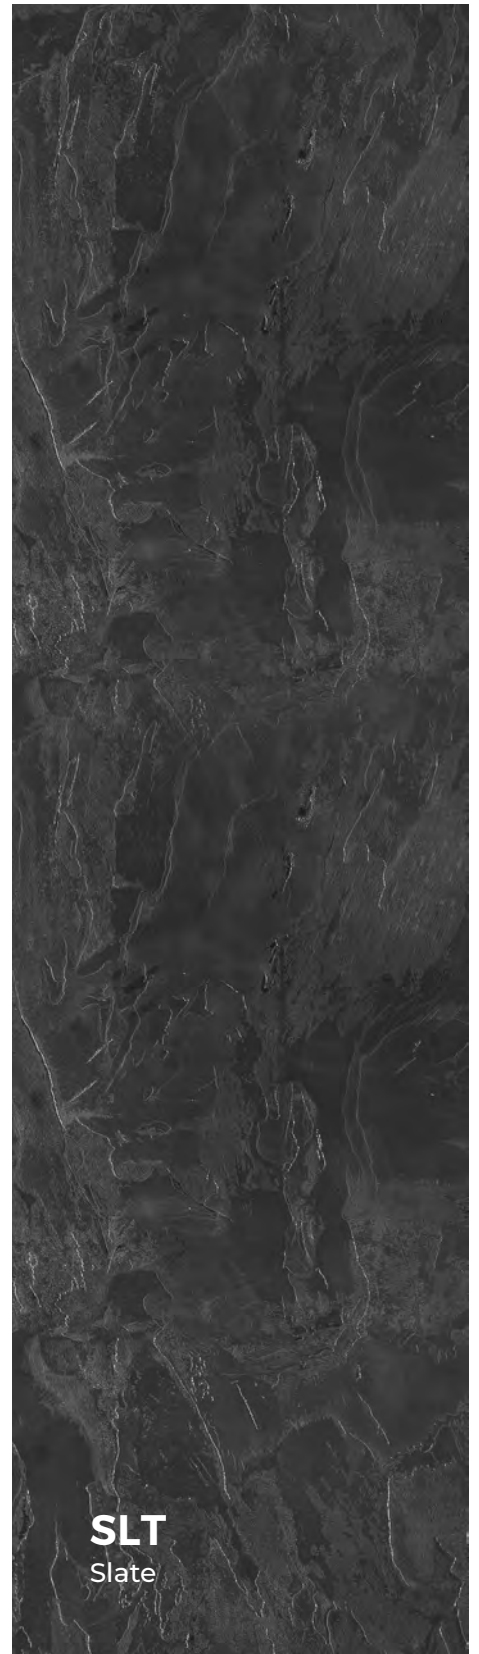

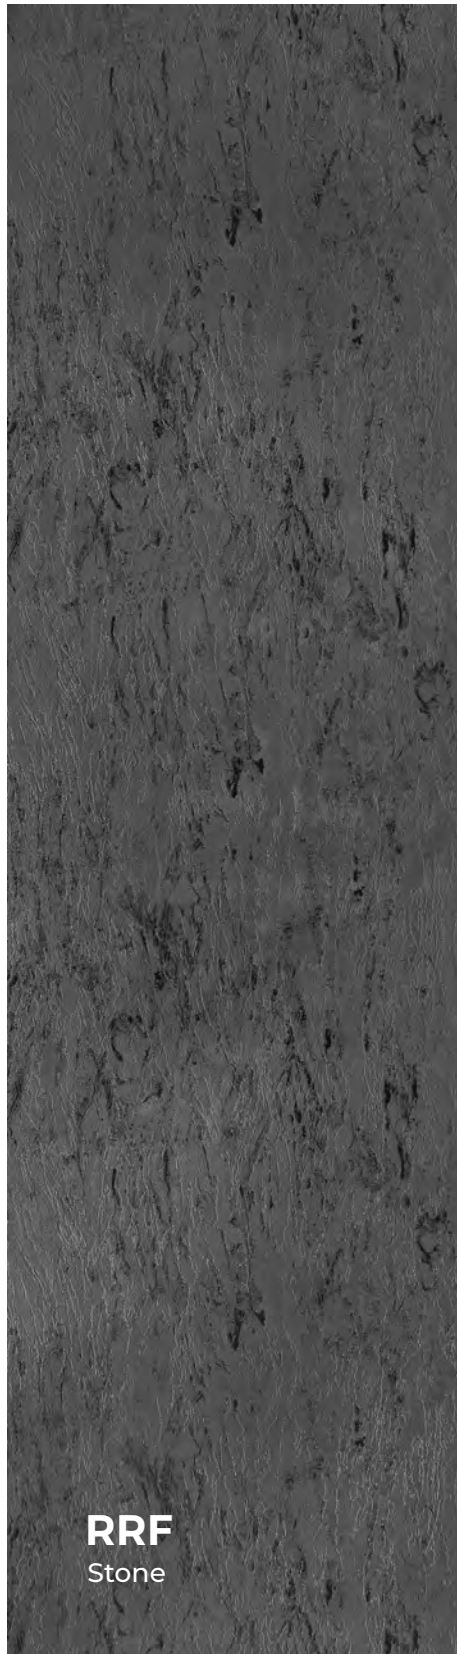

# Textures

Feel, Form, Finesse

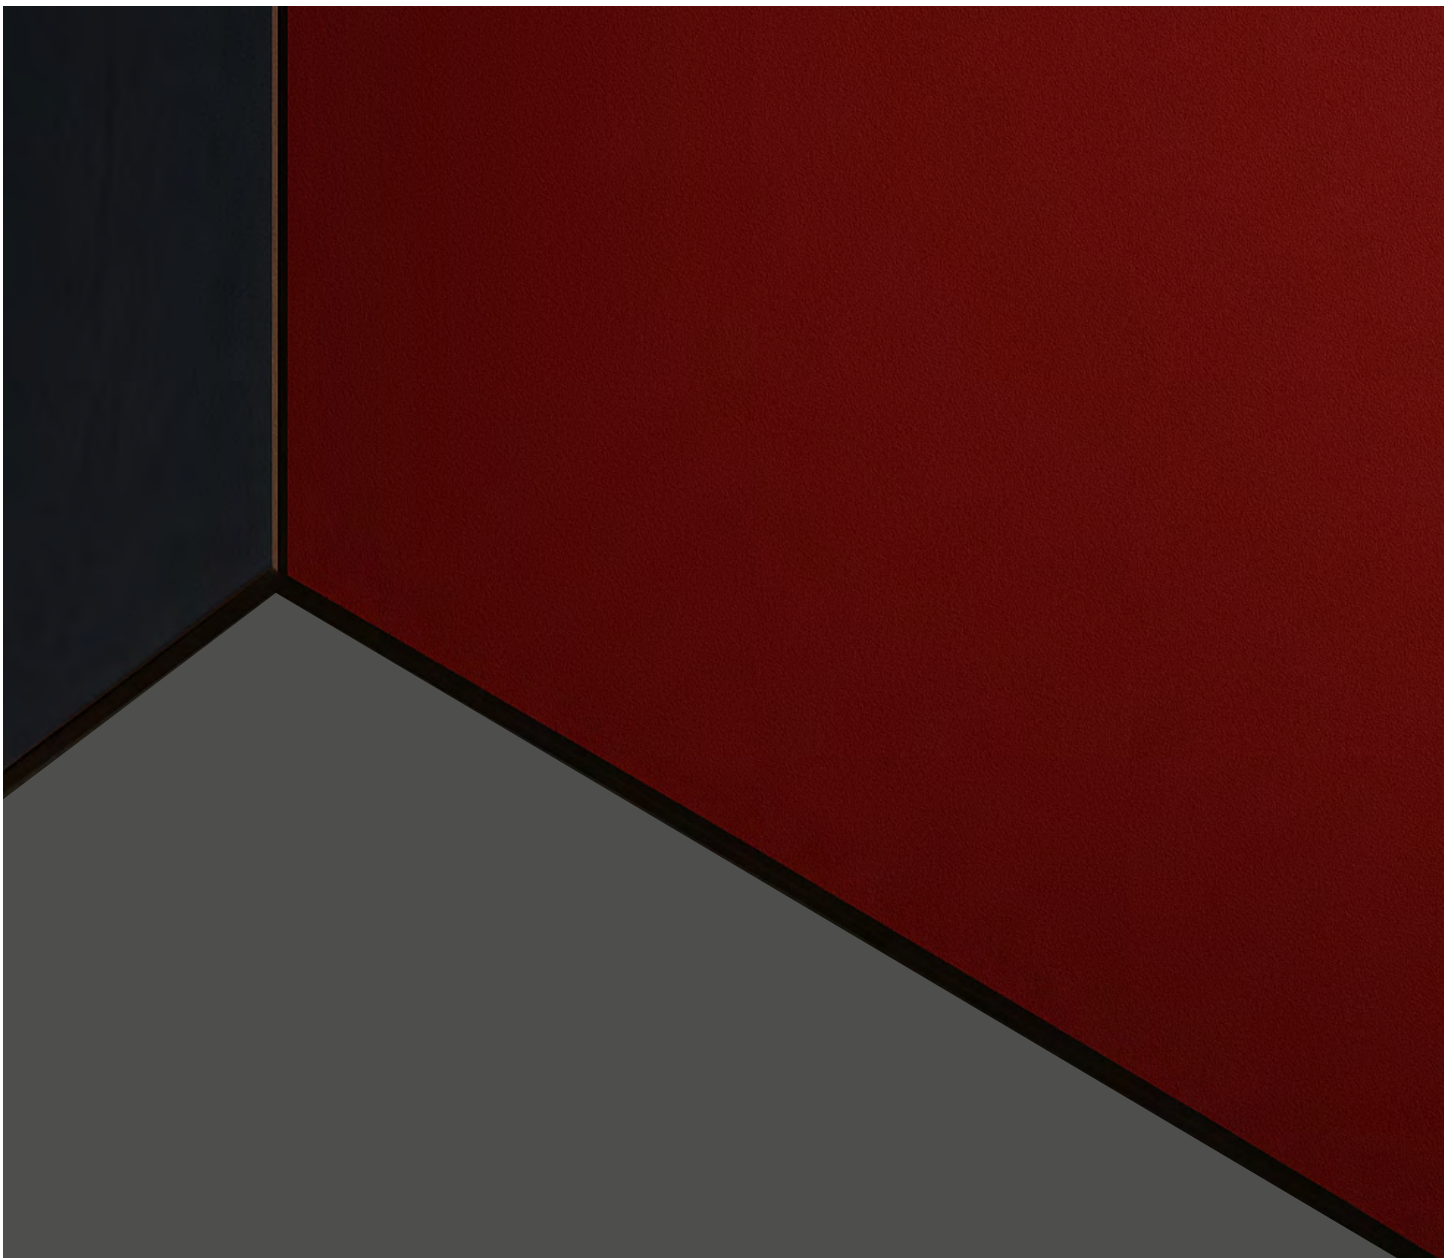

A texture you don't just see, but truly feel — crafted to mirror the touch of nature. Every detail comes alive under your hand, bringing depth and authenticity to every surface.

## SF - Suede

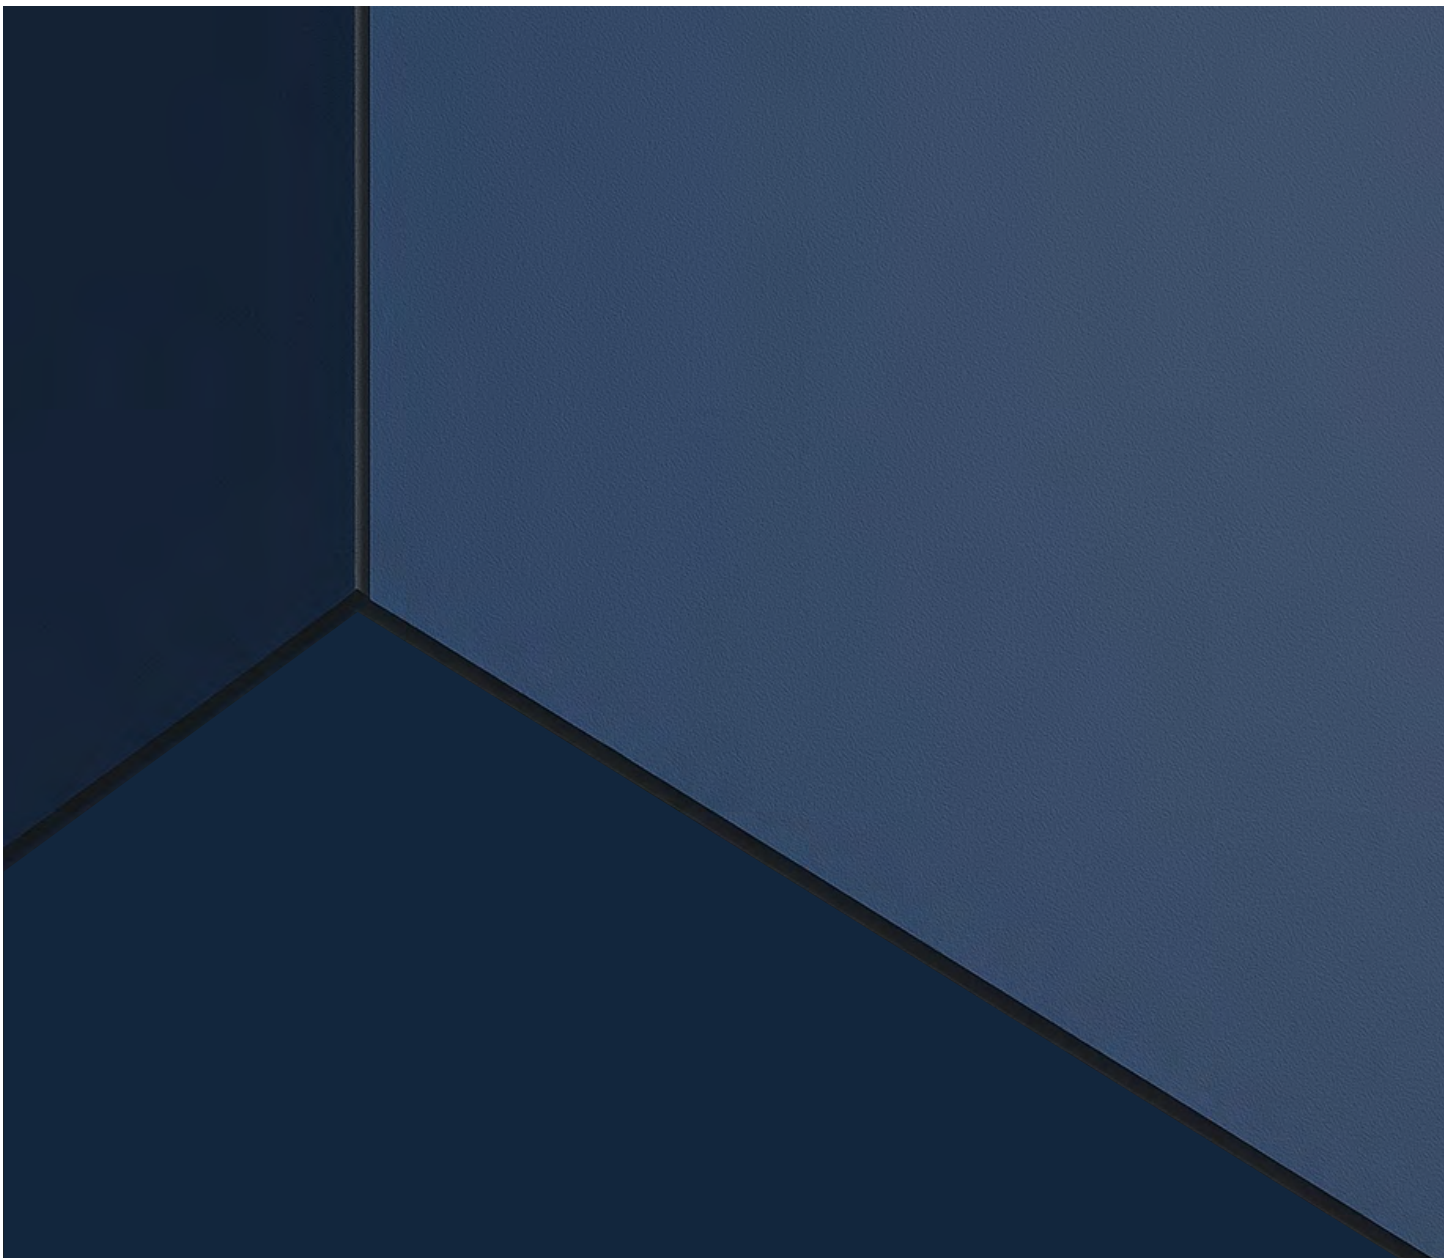

Suede finish exterior laminates offer a soft matte aesthetic that reduces glare and enhances elegance, while also providing excellent scratch and abrasion resistance. The textured surface helps hide minor wear and tear, making it ideal for long-term use. Its low-maintenance nature resists dust, dirt, and fingerprints, ensuring easy cleaning. Additionally, suede finishes are weather-resistant and maintain their appearance despite sun, rain, or temperature changes, making them perfect for exterior applications.

## MF - Matt

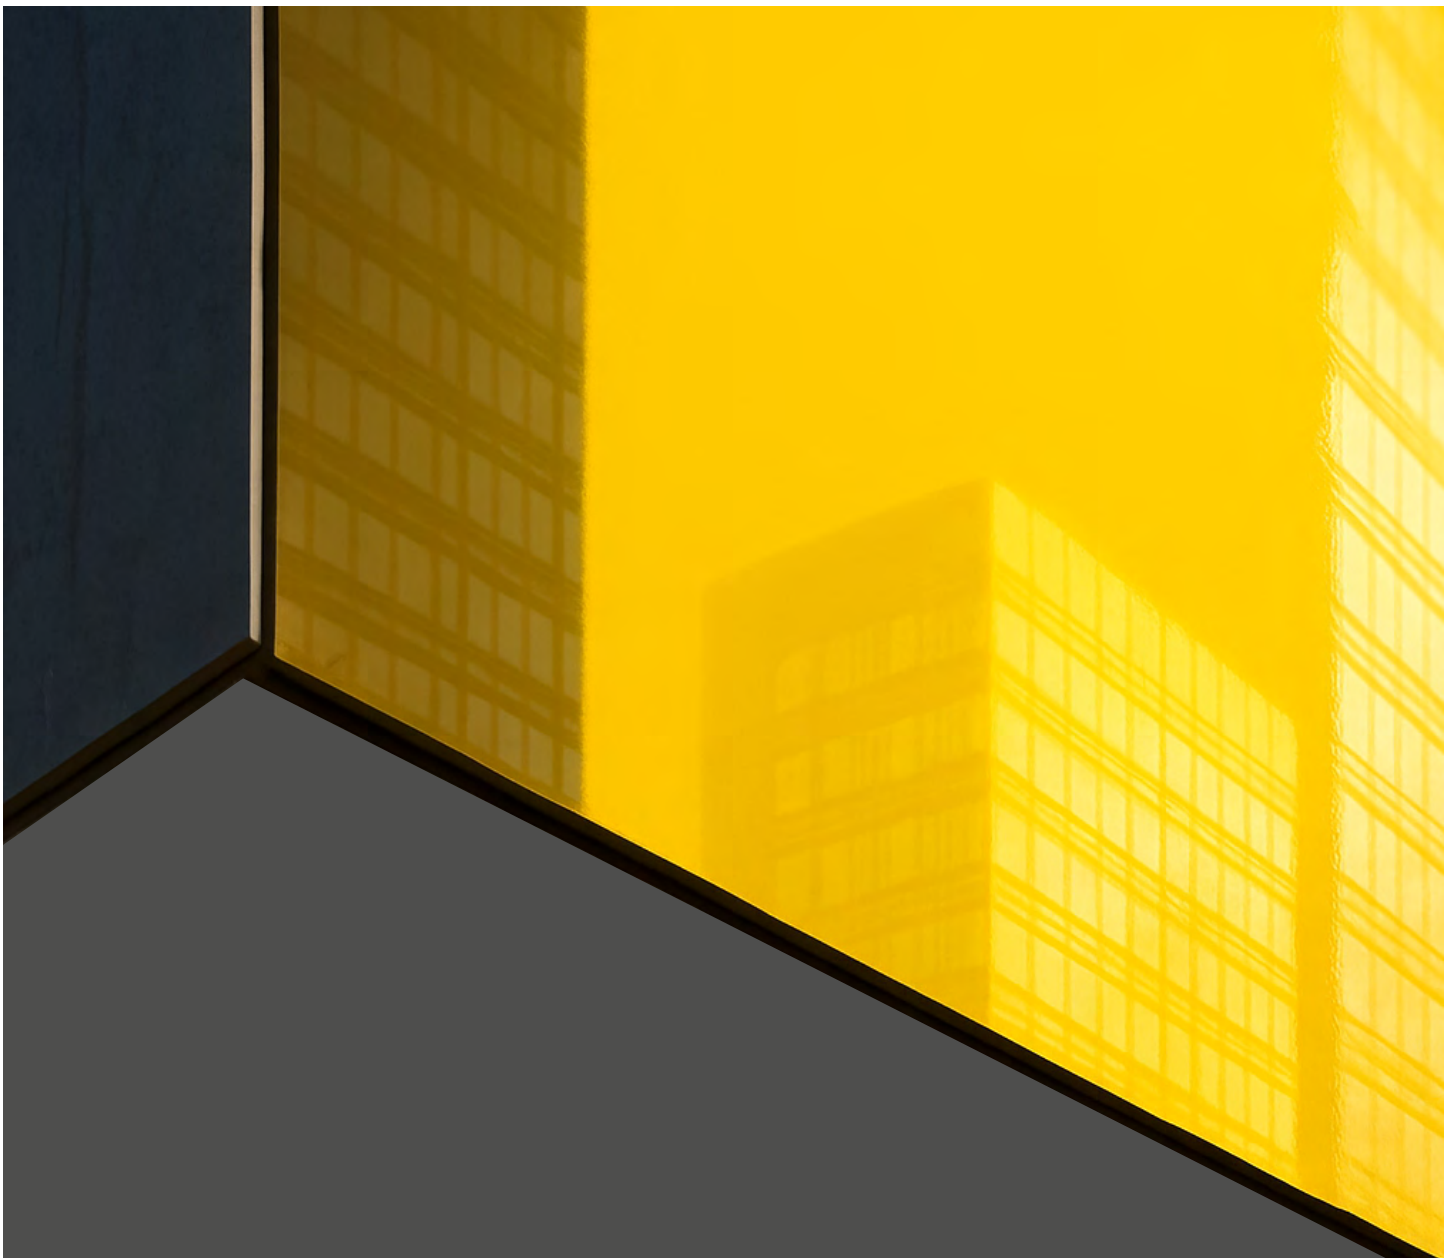

Matt finish exterior laminates provide a smooth, non-reflective surface that lends a sophisticated and contemporary look to facades. They effectively minimize glare and light reflection, ensuring visual comfort in all lighting conditions. Known for their ability to resist scratches and everyday wear, matt finishes help maintain a clean and uniform appearance over time. Their surface is easy to maintain, repels dust and smudges, and retains its original look even in harsh outdoor environments, making them an ideal choice for long-lasting exterior cladding.

## GF - Gloss

Gloss finish exterior laminates offer a sleek, high-shine surface that adds vibrancy and depth to building facades. The reflective quality enhances color richness and creates a bold, premium appearance. Gloss laminates are easy to clean, as their smooth surface resists dirt, stains, and moisture. Designed to withstand outdoor conditions, they maintain their glossiness and color consistency even under prolonged sun exposure, making them a striking and durable choice for modern exterior applications.

## RSM - Stone Matt

Stone matt finish exterior laminates combine the raw, natural look of stone with a smooth, non-reflective matte surface that brings a grounded, earthy elegance to facades. They offer the visual texture of real stone without the weight or maintenance challenges. The matt finish reduces glare while providing excellent resistance to scratches, stains, and weathering. Ideal for creating timeless and durable exterior spaces, stone matt laminates deliver both aesthetic depth and long-lasting performance.

## RRF - Stone

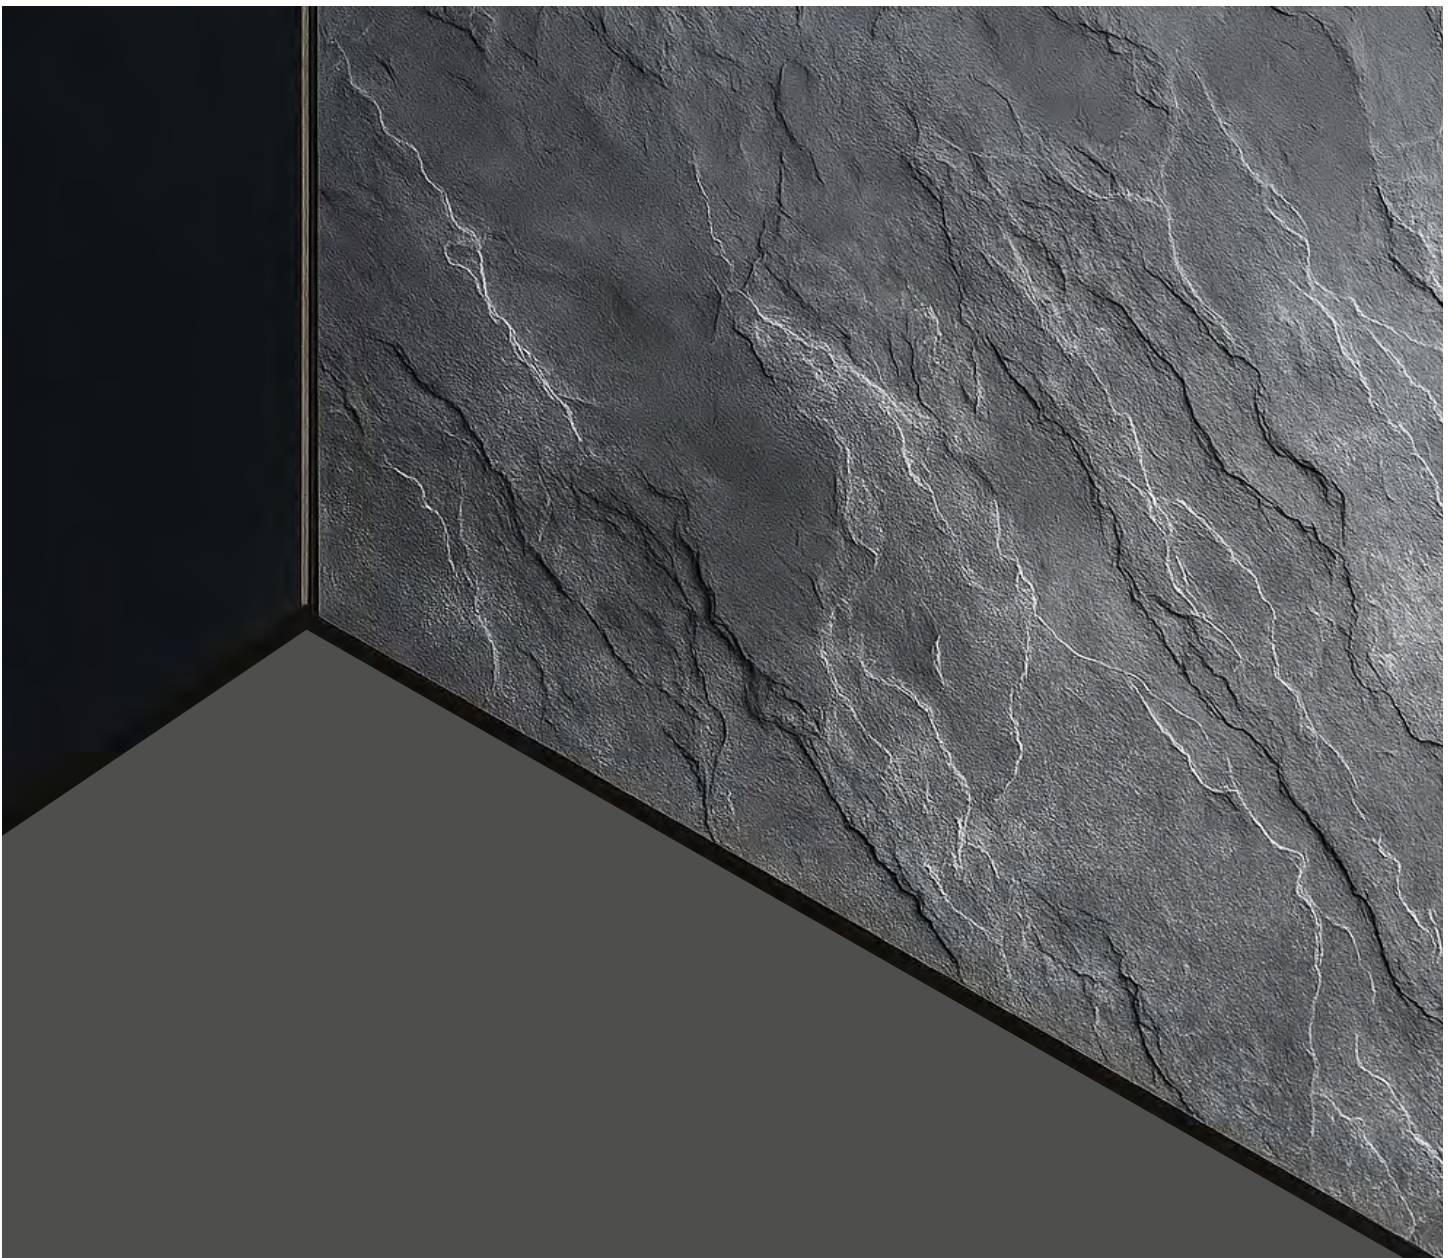

Stone finish exterior laminates replicate the rich textures and organic patterns of natural stone, bringing a bold and timeless character to building facades. They offer the visual appeal of real stone with the benefits of lightweight, easy-to-install panels. Highly durable and weather-resistant, stone finish laminates withstand harsh environmental conditions while maintaining their color and texture. Perfect for creating earthy, architectural exteriors with minimal maintenance and maximum design impact.

## SLT - Slate

Slate finish exterior laminates capture the rugged elegance of natural slate stone, offering a textured surface with subtle tonal variations for a sophisticated, organic look. Designed to mimic the layered feel of real slate, this finish adds depth and character to any façade. It combines aesthetic richness with high durability, resisting weather, UV rays, and everyday wear. Easy to maintain and lightweight compared to natural stone, slate finish laminates are ideal for creating striking, long-lasting exterior cladding solutions.

# Synergy Collection

Depth, Detail, Distinction

The Synergy Collection is where design finds harmony. Every element is thoughtfully crafted to bring balance between textures, colors, and functionality, creating interiors that feel timeless yet contemporary. It's more than a collection — it's an expression of elegance coming together in perfect unison.

## Term & Conditions

\*All Dimensions are in mm

\*All image are for illustrative purposes only.

\*\*Standard panel sizes are manufactured with a tolerance of +10 / -0 mm in accordance with EN 438-6, section 5.3. For applications requiring precise dimensions and exact right angles, it is recommended to trim all edges. Please note that trimming may reduce the net size by approximately 10 mm, depending on the cutting method.

\*UV Protection available on both sides on demand

\*FR Grade available on demand as per MOQ

\*All Images are only for reference.
